

STAT 3830 - Statistical Methods II

Mid-Term Project

Group 01:

Name 1:-----

Professor: Dr. Lasanthi Watagoda

Name 2:-----

Due Date: 11/10/2017

1. Project Description:

You will be analyzing one dataset. Follow the link to see the data description.
<http://lagrange.math.siu.edu/Olive/museum.lsp>

This data set consists of measurements taken on skulls at a museum and was extracted from tables in Schaaffhausen (1878). There are at least three groups of data: humans, chimpanzees and gorillas.

2. You should be able to copy and paste the data lines into SAS.
